(W) standard removed from the Polish Standards catalog without replacement.
* Maximum acceptable value or range in order to COMMISSION REGULATION (EC) No 2073/2005 of 15 November 2005 on microbiological criteria for foodstuffs
[1]Data declared by the Customer, information obtained from the Customer may affect the validity of the result

In case of sampling and delivery of the sample by the Client, the Laboratory is not responsible for the process of sampling and transportation of the samples for testing.

Results marked with a below (<) sign and an above (>) sign mean that the results lie below and above the range.

The test results apply only to the sample received and tested.

NZ result a statement of nonconformity, ZG result a statement of conformity.

The laboratory provides uncertainty: at the customer's request, when conformity to requirements is evaluated, when it is relevant to the validity and applicability of the test results.The laboratory reports the uncertainty as expanded uncertainty with a confidence level of 95% and a coverage factor of k=2. Where the sample is provided by the customer, the uncertainty does not include the sampling.

Uncertainty of testing and statement of conformity was agreed with the customer at the ordering.

The Laboratory is responsible for all information in the Test Report, except for information provided by the Client.

Test reports may not be reproduced except in their entirety without written permission of the Laboratory.

The original Test Report is issued in electronic form with the extension*pdf, signed with a qualified electronic signature. Therefore, all hard copies, unless certified as true copies of the original, are copies.

Complaints must be received no more than 14 days from the date of mailing of the Test Report. Complaints may be received at: biuro@ekolabos.pl.
